TRAY ASSEMBLY

TRAY ASSEMBLY MADE EASY

AIM™ - Tray Assembly is a breakthrough product that structures the process of tray assembly resulting in improved process quality and more efficient throughput.

AIM™ can be interfaced with instrument management systems and automated instrument storage systems. Interfacing provides more accurate data and more efficient missing instrument retrieval – all in compact mobile system that is easy to use and install.

Please contact us to learn more about what the AIM™ System can do for you.

Advanced Vision Technology

AIM™ adds advanced AI and vision technology to the tray assembly process.

Improve Process Quality

Tens of thousands of trays processed with zero defects.

Faster & Easier Technician Training

New technicians have been trained to be productive in weeks, not months.

Better Technician Accountability

Actionable instrument level data is used for process improvement.

Increased Productivity

Increase tray throughput by 40% or more with AIM™ Tray Assembly.
